

## **Thank you for your interest in Nash's 2009 Farm Share Program!**

*Nash's seasonal eating adventure runs twenty-five weeks from mid July to the end of December.*

### **By becoming a Farm Share Member you will receive:**

- 25 weekly boxes filled w/ 9-12 varieties of fresh organic vegetables, fruits & grains
- Weekly newsletters w/ updates from the fields, information about lesser-known vegetables, & recipes & preparation tips for success in the kitchen.
- An increased awareness both about agriculture in the Puget Sound & the importance of community support for local farmers.
- Invitations to special events such as the annual Strawberry Picnic (hosted in the berry patch!), farm tours, barn dances & workshops.

### **The farmer receives:**

- Your financial commitment at a critical time in the growing season, to help fund seed purchases, equipment, supplies, & employees necessary for spring planting.
- A personal connection with the community & the folks the farm is feeding.
- Financial security that allows us to continue as stewards of the Dungeness Delta.

### **The Real Deal**

Nash's Community Supported Agriculture (CSA) program is the *real deal*—we don't purchase products from other states or countries for the boxes! As a Farm Share Member you get to know the hands that feed you, and can be assured that 95% of what's in your box\* is grown in the Dungeness River Valley on our certified organic, Salmon Safe Certified farm. Everything is harvested in its prime so you get the freshest & most vitamin/nutrient rich produce possible.

### **Share The Harvest**

As the season progresses and crop diversity changes, the farm's bounty is reflected in your Farm Share. Our CSA program provides your family with 6 healthy months of delicious produce!

### **Share The Adventure**

Farming can be a risk. Nash calls it an adventure! His team plants a diverse selection of crops, among them, his famous carrots—the sweetest & most-tender in the Northwest. Subscribe and enjoy the luxury of tasting vegetables you may have never had before.

### **Meet Your Farmer**

Nash Huber was raised on a farm in southern Illinois. Since founding Nash's Organic Produce 30 years ago, he has been working to provide healthy organic food for Puget Sound communities. Today, Nash's management team includes 5 young farmers who are committed to the future of the farm. Nash's Organic Produce is certified as an organic producer by the Washington State Department of Agriculture, and has received several stewardship awards.

-*2008 Steward of the Land*, American Farmland Trust  
<http://www.farmland.org/programs/award/default.asp>

-*2006 Vim Wright Stewardship Award*, Farming and the Environment. Take a virtual tour of Nash's stewardship practices at: <http://www.farmingandtheenvironment.org/>

\*Because of the demand for seasonal fruit, we do purchase Washington-grown organic peaches, nectarines, and apricots from certified organic growers on the east side of the state, with whom we have cultivated direct relationships.
